HCL AUTOLOADER

Pioneers in the field of disc technology, Microboards Technology has a long history and considerable expertise when it comes to delivering innovative, high-quality products and solutions customers can count on. The Microboards HCL Autoloader is one of those products because nothing else offers the same capacity, reliability, and throughput as the HCL Autoloader. When you need to burn a lot of CDs, DVDs, Blu-ray Discs, or even LightScribe CDs or DVDs, the HCL Autoloader is the simple choice for large automated runs.

Available in multiple recorder configurations to fit anyone's time requirements or budget, choose from 4, 6, or 8-drive options, all featuring a staggering 1,000-disc capacity. Innovative solutions to common industry problems are corrected in the HCL Autoloader, including a disc counter that tracks the number of good/bad discs. Store and queue multiple jobs for uninterrupted disc production. Don't let a bad batch of discs slow down your production! A sticky disc separator option provides an added layer of insurance by helping separate those annoying sticky discs, which normally is a fatal error for unworthy automated production systems.

When you need lots of discs duplicated and you simply can't wait, the answer is simple—the Microboards HCL Autoloader. No external PC or wires to connect. Keep things simple. Plug it in, turn it on, and start duplicating CD-Rs, DVD-Rs, and DVD-RWs instantly.

For more information on the many different HCL configurations available, log on to microboards.com or call 800.646.8881.
